

Safe Control of Mains Connections

Who Should Attend

Individuals involved in making mains connections on the water network

Prerequisites

When registration is requested for SCMC (W): Competent Person, the individual must hold valid registrations for;

- National Water Hygiene
- Utility SHEA (Water)
- Network Construction Operations (Water)

Aims

The scheme is designed to brief all of the individuals involved in making mains connections of both their own roles and responsibilities, and those of others, when carrying out work. It does not provide the skills required to carry out the connection and it would be expected that individuals involved would hold the necessary registrations such as National Water Hygiene, Utility SHEA (Water) and Network Construction Operations (Water) where appropriate.

Objectives

The aim of the card schemes is to keep a record of supervisors and operatives who have achieved a recognised level of competence and to provide a means of identification.

Duration

½ Day
